Helpful Tips

- ♦ Our [Skin Repair Cream](#) has been shown to help clear up psoriasis and eczema.
- ♦ Studies have shown that peppermint may make you a more attentive driver.
- ♦ Citrus scents may make you more alert.
- ♦ When men smell grapefruit, studies have shown, they say women appear six years younger than they actually are! Find grapefruit in any of our citrus scented products or in our [Essential Oil Travel Kit](#).

About WMO

Once upon a time, two sisters argued.

After a particularly rousing sibling battle over who looked older, Pauline (*definitely older*) threw a magazine (*printed on recycled paper, of course*) at Pam (*the sensible one*). The magazine missed hitting Pam.

But...fate intervened and the magazine landed and opened to the classified section, which neither ever read. The first advertisement was for an aromatherapy business for sale.

Pauline made first contact with Wild Mountain Organics' creator and a wonderful relationship was formed. Pam wanted in on the action and an incredible partnership was founded.

All relationships should be this perfect.

Only part of that story is true. We leave it up to you to decide....

What relationship is perfect?

The relationship Wild Mountain Organics nurtures with your mind, body, and spirit.

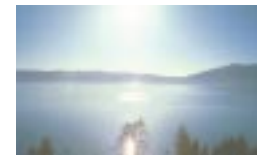

What makes our products unique is our commitment to using only pure fresh flowers, herbs, and flower essences. Many of the plants are harvested in the wild or grown organically. No synthetic fragrances are ever used. No petrochemicals or animal products are used in any of our formulations.

We welcome you to Wild Mountain Organics.

ENJOY!
